

Satel-95

Bag Weigh Check Kiosk

We are proud to present our newest technology, providing valuable service for airports. Air passengers are becoming very sensitive to charges for over-weight baggage, implemented by airline companies and are keen to understand the weight of their bags prior to check in. To be sure that they are not exceeding their allowances and to enable them to adjust weights across bags to minimise extra charges, Satel-97 offers a cheap and effective service, that ensures your bags will be "fit" enough to travel with you for no extra charge. It is really simple, just choose the airline company you are travelling with, weigh your luggage and check your ticket to see if you are within the allowed baggage weight.

Technical specification

- Power supply 220 V , 50 Hz - power consumption less than 2 Amp. By nominal usage.
